

Registrant Spotlight

Josh Peterson, RCIS

Josh became interested in invasive cardiology after taking health science classes in high school and Anatomy and Physiology in college, his favorite class. Once he narrowed his focus to the medical field, he found cath lab technology to be very interesting and rapidly evolving. He then continued his education in 2009 by earning his Associate of Applied Science degree from Rochester Community & Technical College (RCTC) and the Cardiovascular Invasive Specialist certificate from the Mayo Clinic School of Health Sciences.

For the past ten years, Josh has been employed as a Registered Cardiovascular Invasive Tech with Heart Rhythm Services at Mayo Clinic in Rochester, Minnesota. He takes great pride in holding the RCIS credential and states, "It definitely gives you a sense of achievement once you pass the exam." Mayo Clinic Heart Rhythm Services Lab requires all staff to hold either the RCIS (Registered Cardiovascular Invasive Specialist) or RCES (Registered Cardiac Electrophysiology Specialist) credential.

Josh's supervisor, Jessica Evjen, RCES, says, "He is currently one of our Lead Technicians and strives to make a difference in all of the roles he has in the lab. Not only is he dedicated to our patients, but he is a trusted and valued colleague to all. He has

excelled in all areas of the lab, from scrubbing complex device cases, to 3D mapping on multiple systems, to mastering EPIC integration. Each day he leads by example by coming to work with a positive attitude and having the ambition to get the job done in a safe and timely manner."

Josh lives in Goodhue, Minnesota with his wife Laura of ten years and his three girls, Lily (13), Avery (8), and Riley (5). They enjoy family bike rides around town, hiking at State Parks, and playing basketball in the driveway.

CCI spotlights registrants for accomplishments and dedication to the cardiovascular profession. Submissions may be sent to Christine Johnson at cjohnson@cci-online.org.
